INSTRUCTIONS

1. Choose the colour (or colours) you want to use for your dinosaur.
2. Using the Dinosaur Template available at www.austpaper.com.au carefully cut out each section of the Dinosaur. You can either place the template over your Spectrum Board and cut out directly or trace the template on to your Spectrum Board and cutout from your traced guide lines.
3. You will have noticed on the Dinosaur Template some dotted lines. These dotted lines indicate where you need to make slit marks so the pieces of your Dinosaur can fit together. Carefully cut along the dotted line section.
4. Before you slot your Dinosaur together, now is the perfect time to decorate it. Decorated it anyway you like, we have used pen to draw a face and pencil to draw markings on the Dinosaur. Feel free to use your imagination and come up with any design you like. You may also want to use Glitter or other materials on your Dinosaur.
5. Once you have finished decorating your Dinosaur (and if you glued other materials on to your Dinosaur; make sure the glue is dry) you can now slot the pieces together.
